GIOORGIO
dental laboratory

we're all smiles.®

The ultra translucent zirconium oxide by White Peaks has great strength with unrivalled translucence resulting in some beautiful aesthetic results without the porcelain overlay.

GIO.BRUX™ ULTRA combines beauty and brawn. The resulting restoration is aesthetically pleasing whilst strong, biocompatible and with the ability to be prepared conservatively.

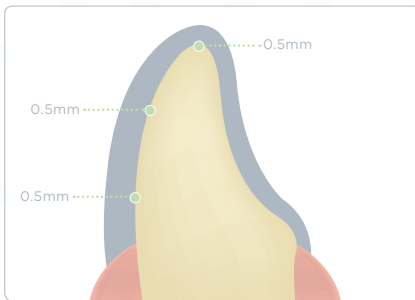

This restoration essentially replaces the Gold Crown where a more conservative and less invasive preparation is required.

Our manufacturing process ensures perfect fit and predictable results. It can be used to make single copings and bridges.

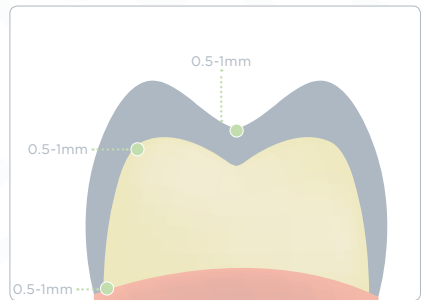

IMPRESSION TECHNIQUE	Digital or Traditional
MATERIAL	Ultra Translucent Monolithic Zirconium Dioxide
RECOMMENDED USE	Posterior regions with conservative preparation requirements
AESTHETICS	★★★★
CEMENTATION	Regular
MANUFACTURING METHOD	CAD-CAM milled crown with hand staining and finishing
STRENGTH	★★★★★
WARRANTY	10 Years
TURNAROUND TIME	5 working days
MARGINS	Feather edge, shoulder or chamfer
HIGHLIGHTED BENEFITS	Metal free biocompatibility, Strongest restoration with aesthetics

PREPARATION GUIDE

Recommended Preparation For Anterior Teeth

Recommended Preparation For Posterior Teeth
