we're all smiles.®

The GSB is a provisional without cementation used during the osseo-integration of implants. It has many other applications including treatment for Periodontal cases and as a space maintainer.

There are many reasons why so many of our clients love the GSB

- Unsurpassed aesthetics as well as function
- Enhances patients confidence
- Insertion and removal in minutes by practitioner
- Many other applications including Periodontal work and space maintainer

The invention has been presented at many Industry exhibitions since its invention in the late 90s including the Nobel Biocare Symposium in Las Vegas in 2003 where George presented the GSB as finalist in the Innovation Awards.

IMPRESSION TECHNIQUE	Digital or Traditional
MATERIAL	Non-precious metal
RECOMMENDED USE	Implant treatment, periodontal, temporary, space maintainer
AESTHETICS	***
CEMENTATION	None required
MANUFACTURING METHOD	Hand waxed, cast and finished by Ceramist
STRENGTH	****
WARRANTY	1 Year
TURNAROUND TIME	5 working days
MARGINS	N/A
HIGHLIGHTED BENEFITS	No preparation required, aesthetics & function
